ABOUT

Frontend Engineer with 8+ years of experience building complex web applications, including high-load platforms and Web3 products. Specialized in on-chain UX, cross-chain integrations (EVM & Solana), and scalable frontend architecture. Proven track record of delivering production-ready systems with real-time data, wallet integrations, and performance optimization.

SKILLS

| | |
|-------------------|---|
| Languages: | JavaScript (8+ yrs), TypeScript (5+ yrs), HTML/CSS |
| Frontend: | React, Next.js, React Native, Redux, redux-saga, redux-thunk, MobX, Zustand, TanStack Query, React Router, Formik |
| Web3: | web3-react, wagmi, viem, solana/web3, MetaMask, WalletConnect, Phantom, Keplr (5+ yrs) |
| Other: | Git, Webpack, Vite, Gulp, GraphQL, WebSocket, Nginx, Jest, Jira, Scrum |

EXPERIENCE

Frontend Developer — Xyber (Web3)

February 2025 – February 2026 · 1 year · International

- Built App — onchain App Store hub with wallet connection, agent interaction, and payment flows on Solana/EVM.
- Developed Genesis/0-100 — fair token launch platform with Soft/Hard Cap mechanics, block-hash lottery, automated liquidity locking, XP quests, and leaderboards.
- Delivered Xybot frontend — TEE-verified interactive challenge with real-time prompt queue, attempt tracking, and onchain payment processing.
- Integrated Solana wallets (reown), wagmi/viem for EVM (Base+), and internal SDKs for smart contract state, transactions, and onchain events.
- Integrated Amplitude analytics across key user flows, improving event visibility by ~60% and reducing time-to-detect UX issues by ~40%.
- Technologies: React, Next.js, TypeScript, WebSocket, TanStack Query, Tailwind, wagmi, viem, solana/web3.

Frontend Developer — Entangle (Web3)

May 2024 – February 2025 · 9 months · International

- Built omnichain bridge Hub supporting EVM (Ethereum, Arbitrum, Base, Blast, Sei) and non-EVM (Solana) token transfers with wallet connection and tx tracking.
- Developed UDF and UTS interfaces — frontends for cross-chain data feeds and omnichain token management (deployment, config, supply).
- Created Omnipoints rewards frontend tracking user activity and distributing incentive points across the ecosystem.
- Integrated MetaMask/WalletConnect for EVM and Phantom for Solana; built shared design system components; eliminated unnecessary re-renders.
- Integrated Amplitude analytics to track fundraising funnel behaviour; frontend contributed to a public ICO round that raised ~\$2M.
- Technologies: React, Next.js, TypeScript, WebSocket, TanStack Query, Tailwind, wagmi, viem, solana/web3.

Frontend Developer — DEX & NFT Aggregator (Web3)

March 2023 – April 2024 · 1 year · International

- Added new networks and wallet support (Keplr, Cosmostation, Leap, MetaMask) for a DEX aggregator covering 100+ Cosmos ecosystem networks.
- Implemented limit order functionality, charts, and order book using Recharts, GraphQL, and WebSocket.
- Extended NFT purchase flows with cross-chain payment selection via IBC Swap logic; extracted platform module as a standalone Vite widget library.
- Optimized performance: eliminated unnecessary re-renders and redundant queries.
- Technologies: React, Next.js, TypeScript, Zustand, WebSocket, GraphQL, Tailwind, Recharts, Jest.

Frontend Developer — TruePNL (Web3)

February 2021 – January 2023 · 2 years

- Built a full-scale blockchain investment launchpad: UIKit, 3-tier auth (token + KYC/sumsub + MetaMask/web3-react), project lifecycle tracking, portfolio page, staking, and referral system.
- Developed Robotrading platform: strategy dashboard, dynamic chart updates via Recharts, API key management, and user onboarding.
- Technologies: React, Next.js, custom state manager, web3-react, i18next, React-Bootstrap, Recharts.

Frontend Developer — EXITIV

January 2018 – February 2021 · 3 years

- Sber corporate app module: product catalog, cart, order/delivery tracking, MobX state management, Material-UI — React, MobX, Webpack.
- Online banking (React Native + web): shared Storybook component library, request encryption/decryption, Face ID / Touch ID auth, cross-bank transactions, redux-saga.
- Bistronom grocery platform (SPA + React Native courier app): real-time stock updates, SMS auth, cart with auto-discount calculation, courier route tracking.
- Cryptocurrency exchange redesign (pixel-perfect), video hosting form builder (Formik/Yup), B2B password manager, Roku Smart TV app (BrightScript/SceneGraph).

EDUCATION

Penza State University · Master, Informatics and Computer Science | 2017 – 2019

Penza State University · Bachelor, Informatics and Computer Science | 2013 – 2017
